

AquaPro Pleated Filter SPECIFICATION SHEET

AquaPro cartridges are pleated and have more surface area. Therefore, they filter longer and fewer replacement cartridges are needed.

AquaPro cartridges are cleanable. Therefore, they can be cleaned and reused, five micron and up.

AquaPro cartridges have lower pressure drop, compared to "depth" cartridges. Therefore, smaller filter housings are required for the same flow rate, so filter housing costs are reduced.

SPECIFICATIONS

Filter media	Synthetic (100% cellulose-free)
End caps	Plastics (PVC)
Centre tubes	Polypropylene
Temperature range	40°F - 140°F (4.4°C - 60°C)
Maximum Pressure	40 PSID
Recommended change out	20 - 30 PSID
Flow rate per 20" cartridge	10-20LPM, depending on micron rating
Available Micron Ratings	1, 5, 10, 25
