# FIRST NEED® water purifier TRAV-L-PURE

Water-related illnesses affect nearly 40% of the travelling population. Medicines can treat only the symptoms, and these medicines often are difficult to obtain in foreign countries —prevention always is the best cure. First Need Trav-L-Pure purifier helps ensure a healthy, worry-free trip by removing the contaminants which normally cause distressing water-borne illnesses. When travelling, you and your family can stay healthy and properly hydrated with deliciously refreshing, safe water from the First Need Trav-L-Pure system.

All General Ecology Drinking water systems are ecologically compatible. By combining micro-filtration, broad spectrum adsorption, molecular sieving and other natural separation mechanisms, First Need systems produce safe, clean, healthy water without adding iodine or other pesticides.

General Ecology's First Need systems have passed rigorous verification and field testing by research institutions, health and safety associations, independent laboratories, expeditions and individual users worldwide.

No other system, regardless of price, can match First Need purifiers' combination of all-around effectiveness, reliability, size, weight and operating safety.

## Compare For Yourself

Removes or Destroys	First Need	Ceramic Candle	Pour-Through Straws	Boiling	Iodine, etc.)
Bacteria	YES	-	-	?	yes -
Viruses	YES	no	-	?	yes -
Giardia, Cryptosporidia	YES	yes	-	-	yes ?
Pesticides/Toxic Chemicals	YES	no	no	no	no
Dirt & Sediment	YES	yes	-	no	no
Foul Tastes & Odors	YES	no	-	no	no
Indicates End of Useful Capacity	YES	?	no	no	? no

? Inconsistent, capacity effectiveness unknown.  
- Effectiveness varies - see manufacturer's instructions.

## Easy "Pump and Drink" Operation

1. Pour water into the "easy-fill" pre-screen at top of the unit.
2. Pump and drink.

**The Trav-L-Pure purifier includes:**  
 1 Self-contained unit  
 1 Water-resistant nylon carrying case with "twist free" straps and easy release clips  
 1 Bottle of "integrity test" food colouring  
 Screening, Pre-filtering and Purification stages

## Technical Specifications

**Cartridge Capacity:** Depends upon the water sources and may vary widely. Can range up to 800 pints (400 liters) per canister. Nominal 200-800 pints (varies by source).

**Flow Rate:** 1.25 liters per minute.

**Water Canteen Storage Capacity:** Approx. 22 fl. oz. (650 ml.)

**Unit Weight:** 22 oz. (625 grams)

**Unit Size:** 6.6" x 4.4" x 3.3" (16.8 cm. x 11.2 cm. x 8.4 cm.)

**Important:** First Need Trav-L-Pure unit is intended to provide drinking water, meeting U.S. Public Health Service bacteria standards, from virtually any non-salt water, treatable source.
